LUXURY GOOD DESIGN  
UNIT & CHAIR

## Comfort in an ergonomic design

Visiting the dentist can be an uneasy experience for any patient. Ease the patients fear by choosing W's advanced safety technology. Experience the design with a comfortable and supportive headrest, ergonomical backrest and automatic safety switch.

Color

## Chair

### HEAD REST

The head rest is made with ergonomic design. It surrounds the neck with smooth comfort. The head rest is convenient to use with the push of only one button.

### BACK REST

An ergonomically slim backrest is designed to provide the ultimate in access and comfort for the dentist's legs and knees.

### ARM REST

A simple yet functional armrest provides easy access to the chair without hindrance. It gives optimal support

## Clean space and ease of functionality

With many patients visiting your clinic everyday, hygiene is of the utmost importance. The unit features a glass spittoon and suction filter which are detachable and easy to clean. W's hygienic unit ensures the dentist can work in a relaxed and healthy environment.

### Unit

**SPITTOON**  
The spittoon is made of glass for superior protection against chipping and staining and is easily removable for efficient cleaning.

**ASSISTANT TABLE**  
The smooth pivot point allows the assistant table to swing around the back, allowing various access positions. The unit allows up to 4 instrument holders.

**SUCTION FILTER**  
The suction filter is easily removed for cleaning and disinfection without needing to open the unit.

## Advanced digital display

The touch control panel is located in the center of the table making it easy to see at all angles. The control panel is convenient to use with several user modes including a timer and built in memory.

### Table

**INSTRUMENT HOLDER AND HANDPIECE TUBING**  
When selecting an instrument, other instruments are automatically turned off. The handpiece tubings are easily removed for cleaning and disinfection.

**FILM VIEWER**  
The film viewer can be installed and removed effortlessly without a power cable.

**TOUCH CONTROL PANEL**  
A visual display unit on the keyboard shows the instrument in use and all selected functions. The maximum and minimum light intensity can be selected by the push of a button. Both light intensity modes are displayed on the LCD monitor. The built in micro computer allows three auto positions for three users respectively. The preferred chair position can be adjusted by a manual push button.

## Standard Accessories
